ProModel Releases New Version of its Strategic Planning Solution, Portfolio Simulator

Allentown, PA — October 13, 2009—ProModel Corporation today announced it will launch a new version of its application, Portfolio Simulator, which works with Microsoft Windows® 7 to offer customers enhanced security, as well as innovative user interface features and reliability improvements. Portfolio Simulator is a strategic portfolio and resource capacity planning software application that provides scenario management, simulation analysis, and portfolio optimization in one single solution. The tool is designed to reduce the risk and uncertainty involved in strategic and long term planning by producing objective, accurate, and quantified portfolio performance information to help generate more confidence in predicting an organization's future performance.

"Our ISV community is alive with innovation, and we're committed to helping our partners drive the next generation of software experiences," said Ross Brown, Vice President of ISV and Solutions Partners for the Worldwide Partner Group at Microsoft. "Adding compatibility for the latest Microsoft operating systems helps ISVs to stay ahead of the competition and give their customers access to cutting-edge technologies."

 "ProModel is excited to launch this new version of Portfolio Simulator," said Keith Vadas, CEO at ProModel Corporation. "Making our application compatible with Microsoft Windows 7 helps us offer our customers compelling benefits, including improved security and reliability features as well as tools to keep them connected to data stored on the Web. Portfolio Simulator has passed Microsoft's stringent requirements to become officially Windows 7 Certified, which reflects ProModel's dedication to remaining continually compatible and up-to-date with the changing landscape it's users experience when performing strategic portfolio and resource planning.

By achieving Windows 7 compatibility prior to its release date, ProModel has also been recognized by Microsoft as an official Front Runner Independent Software Vendor. This designation means that Portfolio Simulator is built on the latest Microsoft technology—and is among the first to market.

About ProModel

ProModel is a provider of Predictive Analytics BI Software Solutions that empower organizations to make better decisions - faster, by Visualizing, Analyzing and Optimizing future operations. ProModel solutions combine powerful in-house simulation technology with 20 years of industry expertise in delivering reusable predictive solutions.

ProModel's solutions help decision makers:
• Reach better decisions faster by having more accurate, quantifiable performance information
• Receive faster payback and larger ROI
• Develop internal, reusable predictive problem solving capability.
