

A Brief Profile

ProModel enables organizations to rapidly transform into intelligent enterprises through our prescriptive analytic decision-support platforms. Side by side with our clients, ProModel develops solutions that fulfill their unique needs — now and in the future.

Our solutions provide the vehicle and methodology to link performance metrics, corporate initiatives, resources, risks, and strategic objectives. For our clients this means improved enterprise performance.

Our Customers

- Joint- Joint Forces Command
- Joint- Defense Threat Reduction Agency
- Army- Department of the Army, G-3
- Army- Department of the Army, G-1
- Army – FORSCOM
- Army – AMC
- Army – Medical Treatment Facilities
- Army – Center for Army Analysis
- Navy – CNAF
- Navy – PMA 265
- Navy – NAVSEA
- Navy – NAVAIR
- Air Force – AFPC
- Air Force – AETC
- National Guard Bureau
- TSA
- NASA
- FAA
- GSA
- Lockheed Martin
- Boeing
- IBM
- SAIC
- Northrop Grumman
- Pfizer
- Mayo Clinic
- United States Military Academy at West Point
- Coast Guard Academy

Awards Won by Our Customers for Solutions Built on ProModel Platforms

- Dr. Wilbur B. Payne Memorial Award: West Point- Officer Accessions Flow Timing Improvement
- Dr. Wilbur B. Payne Memorial Award: West Point- BOG: Dwell Ratio Analysis
- Surgeon Generals Award for Analytical Excellence: Evans Army Community Hospital- Improving Behavioral Healthcare in Army Medical Treatment Facilities
- Army Knowledge Management Technology Award: FORSCOM-AST
- RIST Prize: Center for Army Analysis

COTS Process Improvement Projects

- Army Depot – Lean Six Sigma Capacity and Constraint Analysis
- Air Force AFMA – Enterprise Licensing and Custom Training
- Army OEMA/G1- Officer Key Development Flow to Predict Effects of Structure, Policy, and Demand Changes
- USMA Operations Research Center of Excellence - Simulation to determine best alternative strategies to generate Army unit readiness.
- Army Sustainment Command: Reduced Work Order Turn Around Time across 407th AFSB Logistics Readiness Center (LRC).

COTS Portfolio Analytics Projects

- NRC: Developed a re-usable predictive capability to improve resource forecasting for next 10 yrs.
- NASA: Impact of schedule and priorities on project portfolio based on known and unknown changes in Presidential budget.

Custom Development Projects

- Army: ARFORGEN Synchronization Toolset (AST) supporting Sustainable Readiness
- Army: Lead Materiel Integrator – Decision Support Tool (LMI-DST)
- Navy: Naval Synchronization Toolset (NST)
- Joint Forces Command: Joint Forces Capabilities Catalogue (JFCC)

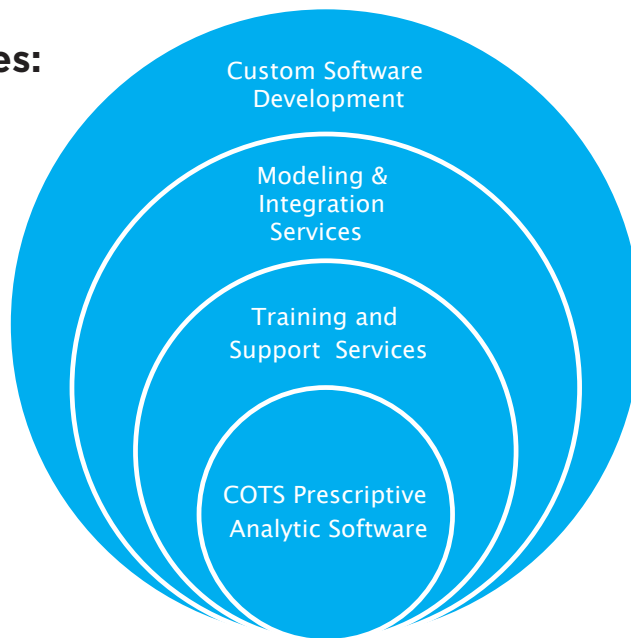

What Our Customers are Saying...

- “ProModel has the best and most thorough software development plan/process I’ve ever seen.”
- Naval Air Systems Command’s Accreditation Agent
- “Thanks ProModel for your outstanding responsiveness, technical expertise, and desire to ensure our Success.”
- U.S. Army
- “ProModel’s expert consultants consistently go above and beyond to ensure their clients’ needs are met. Whether it is accommodating last minute schedule changes or responding to afterhours calls for assistance, the answer is always the same: ‘Can do.’ Simply put, when its clients are confronted with critical, time-sensitive simulation tasks, ProModel delivers.”
- Operations Research Analyst, US Army

Core Competencies:

Design, develop, and deliver commercial-off-the-shelf (COTS) and custom-built prescriptive analytics software, in the domains of:

- Process Optimization
 - Supply Chain & Logistics
 - Force Management
 - Human Resource Management
 - Lean Six Sigma
- Project Portfolio Planning

Provide training, technical support, consulting, customized model building and integration through our highly responsive U.S.-based teams:

- Customer Service
- Training
- Domain Expert Consultants
- Agile Software Development

Prime Contracts:

- General Services Administration — (GSA) IT-70 #GS35F0174T (software, maintenance/support, training, IT consulting)
- General Services Administration— (GSA) Professional Services Schedule (PSS) #GS00F421GA (System Design, Engineering and Integration, Strategic Planning for Technology Programs/Activities, Integrated Logistics Support, Concept Development and Requirements Analysis, Acquisition and Life Cycle Management)
- U.S. Army — FORSCOM (Title: ARFORGEN Synchronization Tool (AST) Support Services for the U.S. Army Forces Command)

Subcontract Vehicles:

- Information Technology Enterprise Solutions - 2 Services (ITES-2S) — (subcontractor to SAIC)
- LOGSA Information Technology Enterprise Solutions (LITES-II) — (subcontractor to IBM)
- AMCOM EXPRESS — (subcontractor in technical [SAIC])
- System Engineering and Technical Assistance (SETAC) Contract 2010 — (subcontractor to Radiance Technologies)
- Concepts and Operations for Space and Missile Defense Integration Capabilities (COSMIC) — (subcontractor to Quantum Research International, Inc.)

Accreditations

- Current Certificates of Networthiness for Process Simulator and ProModel
- NST Airframe Inventory Management (AIM) Module Granted Full Accreditation by the Commander, Naval Air Systems Command

Industry Notables

- Microsoft Partner of the Year Award and three time runner up
- Certified Small Business
- Microsoft Gold Partner
