

## **ProModel Counted Among Top Finalists for the 2010 Microsoft Partner Awards in the Category Information Worker Solutions, Visio Partner of the Year**

Allentown, PA — June 23, 2010 — Today, ProModel announced it has been selected as a finalist for the Microsoft Partner Awards in the Information Worker Solutions, Visio Partner of the Year award category.

“We are pleased that Microsoft has recognized ProModel for two consecutive years as a winner or finalist for a partner of the year award” said ProModel President and CEO Keith Vadas. Our Process Simulator software is a Microsoft Office Visio plug-in that enables users to run dynamic simulations inside Visio.” “We worked very hard to increase the power and ease of use of Process Simulator while leveraging the latest capabilities of Visio”.

Awards will be presented in a number of categories, with winners and finalists chosen from a pool of almost 3,000 entrants worldwide. The Information Worker Solutions, Visio Partner of the Year Award recognizes partners with proven expertise in the planning, implementation, and management of solutions using Microsoft Office Visio as a platform. This award honors ProModel for helping their customers reduce costs, gain business insights, enhance compliance, and reduce IT risks.

“Congratulations to the 2010 Partner Award finalists for delivering such creative and superior Microsoft solutions and services,” said Allison Watson, Corporate Vice President, Worldwide Partner Group, Microsoft Corp. “It’s incredible to see the level of expertise our partners continue to exhibit as they create and deliver innovative solutions and services to grow their businesses, meet customer needs, and drive down costs.”

The customer demand for a tool like Process Simulator continues to grow. One customer in particular, the U.S. Air Force Manning Agency (AFMA) has increased their utilization of the tool because of real results being achieved through ProModel’s solution approach. AFMA indicated this was largely due to the exceptional training and support provided by ProModel to over 300 management analysts.

AFMA experienced a huge success on a critical time sensitive study which was conducted utilizing the full capabilities of the Visio/Process Simulator software suite. The study resulted in immediate approval of over 40 additional manpower resources and approval of many initiatives. Since the initial study 14 additional significant analyses of actions (AoA) have been conducted to determine impact on the work centers.

The Microsoft Partner Awards recognize Microsoft partners that have developed and delivered exceptional Microsoft-based solutions over the past year.
